Taq DNA Polymerase - Great for Genotyping

Routine amplification in a cost-effective way? abm's Taq DNA Polymerase is the answer. abm's Taq DNA polymerase offers consistent results across a wide range of DNA templates with excellent yield and sensitivity. This conventional polymerase is most suitable for PCR applications where less emphasis is placed on fidelity.

With abm's Taq DNA Polymerase, you can expect:

- ✓ Robust PCR performance with great reproducibility
- ✓ Suitable for a wide range of PCR assays, TA cloning & routine PCR amplification of DNA templates up to 6 kb
- ✓ High sensitivity

ABMG009	DNA Polymerase	200 µl (1,000 U)	$50.00
ABMG008	DNA Polymerase	1.0 ml (5,000 U)	$175.00
ABMG126	DNA Polymerase	2 x 1.0 ml (10,000 U)	$285.00
ABMG013	2x PCR Mastermix	5.0 ml (200 rxns)	$86.26
ABMG013-dye	2x PCR Mastermix with dye	5.0 ml (200 rxns)	$93.76

Bestaq High-Fidelity DNA Polymerase - Great for Cloning

Looking to improve? Bestaq™ DNA Polymerase is the new standard. With outstanding PCR yield, exceptional fidelity and high processivity; this versatile enzyme is ideal for all PCR applications. With this superior enzyme, you can consolidate all PCR protocols and reactions into one efficient system.

With abm's Bestaq™ DNA Polymerase, you can expect:

- ✓ High-speed PCR without compromising accuracy
- ✓ High-processivity to reduce reaction time by 70%
- ✓ Robust and high yield across a wide range of templates
- ✓ Efficient amplification of DNA templates up to 15kb
- ✓ Designed for High-throughput PCR, RACE & NGS Library construction through robust amplification of AT- and GC-Rich sequences

Abm's 2x qPCR MasterMix Products are designed for:
- ✓ Gene-expression analysis
- ✓ Gene knockdown & Microarray validation
- ✓ High throughput applications
- ✓ Virus detection and quantification
- ✓ Storage at – 20° C, protected from light
- ✓ SNP genotyping assays*
- ✓ CHiP Copy number variation*

*(applicable to TaqProbe Only)

With abm's 2x qPCR MasterMix Products you can:
- ✓ Enable streamlined protocol in a simple reaction set-up
- ✓ Allow accurate quantification of a variety of gene targets
- ✓ Reduce pipetting steps to minimize the risk of contamination
- ✓ Compatible with most real-time PCR instruments

Protoblot Rapid Western Blotting Buffer (10X)

national diagnostics

- Blot in half the time versus conventional buffers
- Very high efficiency transfer
- Optimal pH for protein stability
- Useable with both semi-dry and wet western blotting
- Pure and stable; ensures reproducibility of results

Simple and effective, the ProtoBlot Rapid Western Blotting Buffer halves the time needed to blot your gels. Less heat build up occurs, and the composition is less harsh, leading to better preservation of epitopes. The efficiency of transfer is very high, improving the signal/noise ratio.

NDIEC-878	ProtoBlot Rapid,	1 liter	$71.60

Histosol Histological Clearing Agent

- Make the switch from harmful xylene
- No changes in protocol required
- Miscible in all portions with ethanol, isopropanol, and t-butanol
- Miscible in all paraffin-based tissue embedding media
- Miscible in all permanent mounting material

national diagnostics

Histosol is the original high flash point (114°F TCC) histological clearing agent. It is intended to be used as a replacement for xylene where the hazards associated with aromatic hydrocarbon vapours are to be reduced.

Arabidopsis Chamber

PERCIVAL

Features:

- Adequate space for growing the plant to full maturity
- Vertical upward air flow to minimize heat from the underlying light fixture
- A large number of humidity control options
- IntellusUltra Controller allows you to control temperature, humidity (optional), CO_2 (optional) and lighting. IntellusUltra Web Server (optional) lets you program and monitor your growth chamber from your desk, laptop or phone.

The unique features and benefits found in our Arabidopisis chambers can be found in many of our chamber applications. Contact us to discuss your specific needs.

Chambers Starting from $16,750.00

Seed Germination

PERCIVAL

Percival Seed Germination chambers are designed exclusively for seed germination and development. Our chambers remove the worry of outside contamination while providing precision control.

Seed Germination Chamber benefits include:

- Slide out shelves allow for multiple experiments while using less space
- Magnetic door gaskets ensuring a tight seal to each chamber and eliminating worries about your research being contaminated by outside elements
- Horizontal air flow
- Continuously-running condensing units for precise temperature control and long-lasting chambers
- Precise control of light levels via the IntellusUltra real time controller
- IntellusUltra Controller allows you to control temperature, humidity (optional), CO_2 (optional) and lighting. IntellusUltra Web Server (optional) lets you program and monitor your growth chamber from your desk, laptop or phone.

PLANER

Kryo Control Rate Freezers

Helping the viability of your samples

Whether you need to freeze one straw or 8,000 vials, Planer can provide a programmable freezer to suit the requirements of your laboratory.

Repeatable, consistent results

Planer's range of freezers has been tried and tested for many years, helping:

Improved cell viability by freezing below the glass transition point to -180° C

Outstanding tractability thanks to the compliant record of freezing run

Unrivalled repeatability with user definable freezing profiles

The Planer Range of Kryo-Freezers

Ideal for IVF & ART and research laboratories, the Kryo 360 is a medium capacity freezer.

Designed for the busy laboratory, the Kyro 550-16 is an integrated stem cell and large quantity controlled rate freezer.

Perfect for volume cell line, blood bag or vaccine storage, the Kyro 1060 is an extra large capacity controlled rate freezer
